Model 8500 shown in Colonial design

Door Construction

- Rugged design consisting of nominal 2" thick door panel construction.
- Embossed, high tensile steel front panels give the look of wood with the strength of steel.
- Two-coat, baked-on polyester finish is virtually maintenance-free. This finish also makes an excellent base if you repaint to match the existing exterior colors of your home.
- The foamed-in-place polyurethane insulation is chemically bonded to each 2" thick steel section, creating a structure with higher strength and dent resistance.
- Heavy-gauge steel wraparound end caps trim-out door edges for better appearance, improved strength and to protect the foamed-in-place polyurethane insulation from damage.
- The polyurethane foam is CFC-11-free, so it's environmentally friendly.
- Sound-absorbing insulation makes the door operate quieter and eliminates wind-rattling.
- Hot-dipped galvanized vertical supports add strength and durability.
- SilentGlide™ rollers with nylon tires and solid steel shafts provide years of smooth, quiet, dependable service.

ONE FIRST AFTER ANOTHER.™

Model 8500 Specifications (Continued)

Design

- Steel front panels are embossed with a wood-grained texture giving the look of genuine wood.
- Panel designs available in white, taupe, almond and brown.

Colonial

Contemporary

Safety & Security

- Lifting handles reduce risk to fingers from closing door panels.

Warranty

Model 8500 offers a Lifetime Limited Warranty against cracking, splitting, rusting through or section deterioration. See dealer for complete warranty details.

Even More Features

Why not buy a new *idrive*® wall-mounted opener or *prodrive*™ ceiling-mounted opener to go with your new door? Only Wayne-Dalton manufactures and designs both the door and opener to work together as one complete system.

Windows

- Many decorative window inserts are available to enhance the look of your garage door, which in turn enhances the look of your home. Here are just two examples. See brochure or web site for all options.

Energy Efficiency & Noise Control

- The core delivers R-15 insulation, more than twice as much as the same thickness of common polystyrene insulation.
- Thermal break between outside and inside steel surfaces help interrupt energy loss.
- Bulb shaped bottom seal remains flexible even in the cold to keep out bad weather.
- The foamed-in-place insulation helps block street noise from entering into living areas that adjoin the garage.
- Snug-fitting tongue-and-groove section joints seal out wind and weather.
